Index for 1973

A

Air force tracks space objects, How the, November 1973, 8

Apollo
- Emblems and crews, Manned mission, February 1973, 44
- 17 and Taurus-Littrow, Some scientific facts about, April 1973, 4 and May 1973, 4
- Soyuz meeting, February 1973, 45

Arecibo radio telescope, The, December 1973, 23
Ariadne's cosmic thread, July 1973, 46

D

Docking system test article completed for US-Soviet space flight, June 1973, 22

E

Experiments planned for Apollo-Soyuz mission, November 1973, 14

F

15th Anniversary—NASA 1958-1973, December 1973, 4

G

Gemini Spacecraft—how it works. The total story of, January 1973, 4 and February 1973, 4

H

Heat in space, Getting rid of, November 1973, 6
Highlights of 1972 activities, March 1973, 47
How to dig a well—rocket style, October 1973, 26

I

Interplanetary flight, Psychological compatibility in, March 1973, 36

J

Joint space flight, October 1973, 19

L

Launch Schedule, 1973, December 1973, 19

M

Major milestones of NASA program, December 1973, 14
Martian decade, Lessons of the, December 1973, 20
Manned space flights may safely penetrate asteroid belt, June 1973, 25
Mariner 9 mission summary, February 1973, 46
Mariner 9 photographs of Mars, March 1973, 19
Missions in space to the year 2000, April 1973, 46
Moon—"A multi-decker sandwich?", The, July 1973, 44
Moon rover, Continuous loop proposed as wheel for new, March 1973, 17

N

New "Spin-off" benefits from the space program, November, 1973, 17
Newton's law—and ten years of communications satellites, November 1973, 23
Nuclear battery on moon operates continuously for three years, February 1973, 36

O

Orbital stations, Aims and tasks, February 1973, 42

P

Planetary exploration, Ten years of, March 1973, 35
Pioneer 10 half way through asteroid belt, February 1973, 38
Pioneer 10 status report, February 1973, 43
Prognoz in orbit, January 1973, 49
Prognoz probes—explorers of the universe, May 1973, 48

S

Satellites
- Anik 2, Canada's, October 1973, 13
- Intelsat V, Proposed, March 1973, 18
- Nimbus 5, March 1973, 4
- SAS-B—Gamma Ray, January 1973, 40

Satellite-based transoceanic air traffic control, A new system of, August 1973, 40
Satellite nuclear power station, The, June 1973, 4
Satellite sensors produce unequaled pictures of the Earth's weather, November 1973, 20
Satellite that navigates itself, A, October 1973, 18
Saturn, A new kind of ring for, June 1973, 26
Saturn S-IVB stage motor, The, August 1973, 4

Scout—most reliable rocket, February 1973, 41
Sensor system maintains watch on earth's health, February 1973, 29
Skylab
June 1973, 27, July 1973, 5
Experiments (Part 2) July 1973, 23
Experiments (Part 3), August 1973, 19
H-alpha telescopes study the sun, How, October 1973, 22
S-192 multispectral scanner, March 1973, 11
Sky's no limit, The, November 1973, 4
Solar eclipse study has more than 50 projects, Major, August 1973, 38
Solar flare seen through skylab telescope, Huge, November 1973, 22
Solar power cells—How they work in space, October 1973, 25
Space, Colors of, May 1973, 49
Space exploration: Problems and prospects, June 1973, 23
Space shuttle, September 1973, 10
Space shuttle, Life support systems on the, June 1973, 20
Space shuttle transportation system, Looking out for our world with the, September 1973, 4
Space transportation systems, New, May 1973, 34
Stecker-Puget theory of galaxy formation, The, August 1973, 42

T

Telemetry, January 1973, 47
Telescope, Flying stratosphere, October 1973, 28

V

Venera-8: Results of space cruise, February 1973, 32
Viking bioshield, March 1973, 44

W

Weather forecasting from space, October 1973, 4
Weather of Jupiter, The, November 1973, 26
Weather satellite maps rainfall over oceans, December 1973, 22

SKYBAL II ASTRONAUTS, Pete Conrad, left, and Paul Weitz, right, display plaques presented to them at a dinner in Pittsburgh honoring both the astronauts and companies participating in the space program. Willard F. Rockwell, Jr., chairman of Rockwell International, presented Conrad the plaque representing Gemini, Apollo and Skylab spacecraft in which he has flown. Weitz holds a plaque with a replica of the "tool" used in freeing a jammed solar panel on Skylab. Third member of the crew, Dr. Joseph Kerwin, was unable to attend the dinner observing NASA's 15th anniversary. (Rockwell International photo)
